

# PJL Open Frame Power Supply

## 48V 200W 1 Phase / PJL-48V200WBAA

# PJL

### Highlights & Features

- Universal AC input voltage range
- 200W with fan cool and up to 150W convection cool
- Standard industrial footprint of 3" x 5"
- Low inrush current < 20A and up to 90.0% efficiency
- Conforms to harmonic current IEC/EN 61000-3-2, Class C
- Low earth leakage current < 500µA
- Extreme low temperature operation at -40°C
- Lighting approval to UL 8750, IEC 61347-2-13 and others approval to IEC 60950-1, IEC 62368-1

### Safety Standards

CB Certified for worldwide use

<b>Model Number:</b>	PJL-48V200WBAA
<b>Unit Weight:</b>	0.42 kg (0.93 lb)
<b>Dimensions (L x W x D):</b>	127.6 x 76.2 x 34.8 mm (5.02 x 3.00 x 1.38 inch)

### General Description

The PJL-48V200WBAA comes with a + 48V nominal main output. The open frame power supply is designed with small standard industrial 3" x 5" footprint for lighting application. The highly efficient fan cool and convection cooled design with optimum thermal management for high power efficiency. The product can operate from -40°C to +70°C across the entire input voltage range of 85 to 305Vac and features low earth leakage current as well as low inrush current. The built-in active PFC product has safety approval for lighting application according to UL 8750, IEC 61347-2-13 and major international safety standard according to IEC 60950-1, IEC 62368-1 and is certified for EMI standards according to EN55032 Class B.

### Model Information

PJL Open Frame Power Supply

Model Number	Input Voltage Range	Rated Output Voltage	Rated Output Current
PJL-48V200WBAA	85-305Vac	48Vdc	4.17A

### Model Numbering

PJ	L –	48V	200W	B	A	A
Open Frame	Product Type L – Lighting Application Series	Output Voltage	Output Power	Package Type B – Open Frame	Active PFC	TE connector

### Specifications

#### Input Ratings / Characteristics

Nominal Input Voltage	100-277Vac	
Input Voltage Range*	85-305Vac	
Nominal Input Frequency	50-60Hz	
Input Frequency Range	47-63Hz	
Input Current	< 2.20A @ 115Vac	
Efficiency	100% load	> 85% @ 115Vac, > 90% @ 230Vac
	20% load	> 83% @ 115Vac, > 84% @ 230Vac
Max Power Dissipation	No Load	< 0.7W @ 230Vac
	100% Load	< 22.2W @ 230Vac
Max Inrush Current (Cold Start)	< 20A @ 230Vac	
Power Factor	75-100% load	> 0.95 @ 115Vac & 230Vac
	50% load	> 0.83 @ 115Vac & 230Vac
	25% load	> 0.65 @ 115Vac & 230Vac
Earth Leakage Current (Touch Current)	< 500 $\mu$ A	According to CSA C22.2 No. 166 and UL8750 edition 2 <sup>nd</sup> .

\*For power de-rating at 85-100Vac, see power de-rating on page 3.

#### Output Ratings / Characteristics\*\*

Nominal Output Voltage	48Vdc	
Factory Set Point Tolerance	$\pm$ 1.0% (initial set point tolerance from factory)	
Output Voltage Adjustment Range	48-50Vdc	
Output Current	4.17A (200W Max.)	
Output Power	200W	Vout is in regulation until no load.
Operation Mode	Constant Voltage	From no load to maximum load.
Line Regulation	$\pm$ 1% typ. (@ 100-277Vac input, 0-100% load)	
Load Regulation	$\pm$ 2% typ. (@ 100-277Vac input, 0-100% load)	
PARD*** (20MHz)	< 480mVpp	20MHz, warm up for 10mins
Rise Time	< 100ms @ nominal input (100% load)	
Start-up Time	< 500ms @ 100Vac & 240Vac (100% load)	With and without capacitive loads
Hold-up Time	> 5ms @ 115Vac & 230Vac (100% load)	
Dynamic Response (Overshoot & Undershoot O/P Voltage)	$\pm$ 5% @ 100-305Vac input, 0-50% load & 50-100% load & 0-100% load (Slew Rate: 2.5A/ $\mu$ S, 50% duty cycle @ 5Hz, 50Hz, 1KHz)	
Start-up with Capacitive Loads	680 $\mu$ F Max	

\*\*For power de-rating from 50°C to 70°C, see power de-rating on page 3.

\*\*\*PARD is measured with an AC coupling mode, 5cm wires, and in parallel with 0.1 $\mu$ F ceramic capacitor & 47 $\mu$ F electrolytic capacitor.

### Mechanical

Dimensions (L x W x D)	127.6 x 76.2 x 34.8 mm (5.02 x 3.00 x 1.38 inch)	
Unit Weight	0.42 kg (0.93 lb)	
Cooling System	Convection	0-150W
	Fan Cool	151-200W With 400 LFM fan cool, 15mm distance between PSU and fan
Power Supply Header	Input (CN1)	1-1123724-3
	Output (CN2)	1-1123723-4
Wire	Input (CN1)	AWG 18
	Output (CN2)	AWG 18
Noise (1 Meter from power supply)	Sound Pressure Level (SPL) < 25dBA	

### Environment

Surrounding Air Temperature	Operating	-40°C to +70°C
	Storage	-40°C to +85°C
Power De-rating	Temperature (Convection)	> 50°C de-rate power by 3.75W / °C (150W @ 50°C, 112.5W @ 60°C, 75W @ 70°C)
	Temperature (Fan Cool)	> 50°C de-rate power by 5W / °C (200W @ 50°C, 150W @ 60°C, 100W @ 70°C with 400 LFM fan cool)
	Input Voltage	< 100Vac de-rate power by 1.33% / Vac (80% load at 85Vac)
	Cold Temperature	< -20°C de-rate power by 2W / °C (80% load at -40°C)
Operating and Storage Humidity	5 to 95% RH (Non-Condensing)	
Operating Altitude	0 to 5,000 Meters (16,400 ft.)	
Shock Test (Non-Operating)	IEC 60068-2-27, Half Sine 50G for a duration of 11ms, 3 times per direction, 9 times in total	
Vibration (Non-Operating)	IEC 60068-2-6, 10Hz to 150Hz @ 25m/S <sup>2</sup> (2.5G peak); displacement of 0.35mm; 90 min per axis for all X, Y, Z direction	
Over Voltage Category	II	
Pollution Degree	2	

### Protections

Output Overvoltage	< 60V, SELV Output, Latch Mode
Input Under Voltage	Brownout & Brownout Recovery protection
Overload / Overcurrent	> 105% of rated load current, Hiccup mode, Non-Latching (Auto recovery)
Over Temperature	Latch Mode
Short Circuit	Hiccup Mode, Non-Latching (Auto-Recovery when the fault is removed)
Internal Fuse	T4AH
Protection Against Shock	Class I with PE* connection

\*PE: Primary Earth

# PJL Open Frame Power Supply

## 48V 200W 1 Phase / PJL-48V200WBAA

### Reliability Data

MTBF	> 500,000 hrs. as per Telcordia SR-332 I/P: 115Vac, O/P: 100% load, Ta: 25°C
Expected Cap Life Time	10 years (115Vac & 230Vac, 50% load @ 40°C)

### Safety Standards / Directives

Safety Entry Low Voltage	SELV (EN 60950-1)	
Electrical Safety	SIQ Bauart	EN 60950-1, EN 62368-1

	CB scheme	IEC 60950-1, IEC 62368-1, IEC 61347-1 and IEC 61347-2-13
CE	In conformance with EMC Directive 2014/30/EU and Low Voltage Directive 2014/35/EU	
Material and Parts	RoHS Directive 2011/65/EU Compliant	
Galvanic Isolation	Input to Output	4kVac (Reinforced) 3kVac (Production Test)
	Input to Ground	1.5kVac (Basic & Production Test)
	Output to Ground	1.5kVac (Basic)
Isolation Resistance	Input to Output	> 100MΩ
PE Resistance	< 0.1Ω	

### EMC

Emissions (CE & RE)	CISPR 32, EN 55032: Class B	
Immunity	EN55024, EN 55035	
Electrostatic Discharge	IEC 61000-4-2	Level 3 Criteria A <sup>1)</sup> Air Discharge: 8kV Contact Discharge: 6kV
Radiated Field	IEC 61000-4-3	Level 3 Criteria A <sup>1)</sup> 80MHz-1GHz, 10V/M, 80% modulation (1kHz)
Electrical Fast Transient / Burst	IEC 61000-4-4	Level 3 Criteria A <sup>1)</sup> 2kV (Input power ports)
Surge	IEC 61000-4-5	Level 3 Criteria A <sup>1)</sup> Common Mode <sup>3)</sup> : 2kV Differential Mode <sup>4)</sup> : 1kV
Conducted	IEC 61000-4-6	Level 3 Criteria A <sup>1)</sup> 150kHz-80MHz, 10Vrms
Power Frequency Magnetic Fields	IEC 61000-4-8	Criteria A <sup>1)</sup> 10A/Meter
Voltage Dips and Interruptions	IEC 61000-4-11	100% dip; 1 cycle (20ms); Self Recoverable
Low Energy Pulse Test (Ring Wave)	IEC 61000-4-12	Level 3 Criteria A <sup>1)</sup> Common Mode <sup>3)</sup> : 2kV Differential Mode <sup>4)</sup> : 1kV
Harmonic Current Emission	IEC/EN 61000-3-2, Class C	
Voltage Fluctuation and Flicker	IEC/EN 61000-3-3 at nominal voltages and full load	

1) Criteria A: Normal performance within the specification limits

2) Criteria B: Temporary degradation or loss of function which is self-recoverable

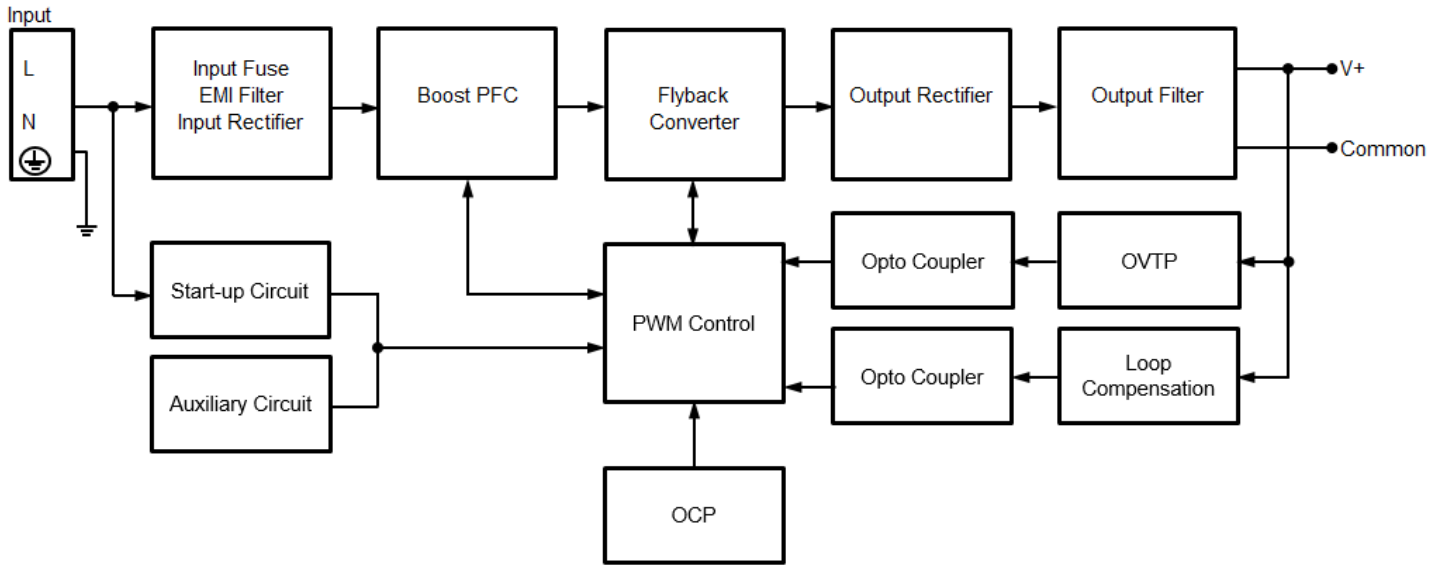

3) Asymmetrical: Common mode (Line to earth)

4) Symmetrical: Differential mode (Line to line)

### Mounting Orientation

### Output Load De-rating VS Surrounding Air Temperature

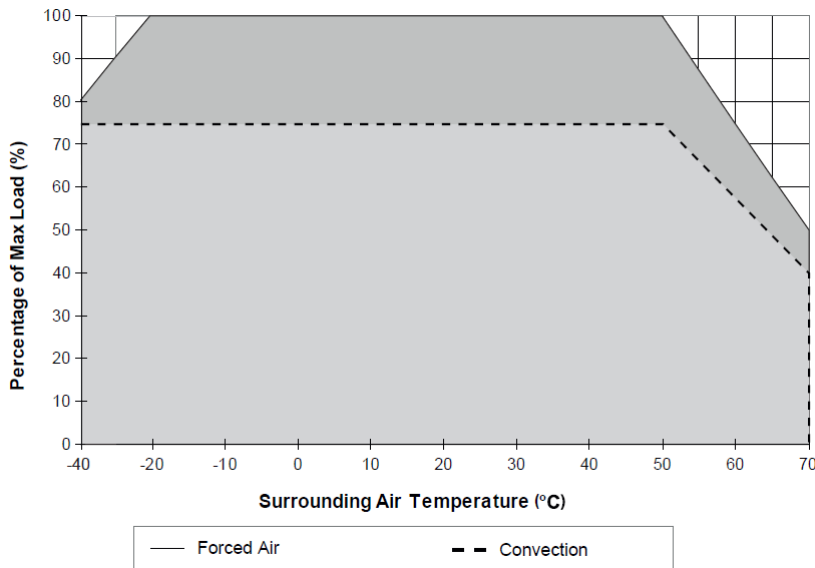

Fig. 1 De-rating for All Recommended Mounting Orientation

Temperature	Power De-rating
<b>Fan cool</b>	> 50°C de-rate power by 5W / °C (200W @ 50°C, 150W @ 60°C, 100W @ 70°C)  < -20°C de-rate power by 1% / °C (160W @ -40°C)
<b>Convection</b>	> 50°C de-rate power by 3.75W / °C (150W @ 50°C, 112.5W @ 60°C, 75W @ 70°C)

### Note

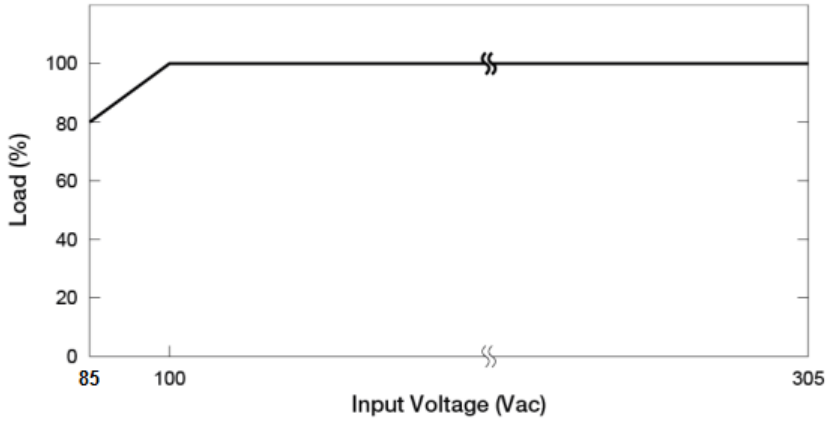

1. Power supply components may degrade, or be damaged, when the power supply is continuously used outside the shaded region, refer to the graph shown in Fig. 1.
2. If the output capacity is not reduced when the surrounding air temperature >50°C, the device will run into Over Temperature Protection. When activated, power supply will latch off, until the surrounding air temperature is lowered or the load is reduced as far as necessary to keep the device in working condition, and require removal/re-application of input AC voltage in order to restart.
3. In order for the device to function in the manner intended, it is also necessary to keep a safety distance of  $\geq 8\text{mm}$  (0.16 inch) at all sides from other components and equipment.
4. Depending on the surrounding air temperature and output load delivered by the power supply, the device can be very hot!
5. If the device has to be mounted in any other orientation, please contact [info@deltapsu.com](mailto:info@deltapsu.com) for more details.

### Assembly & Installation

- Ⓐ Mounting holes for the open frame type of power supply<sup>1)</sup>.
- Ⓑ Mounting holes should be connected to the system's protective earth (PE)<sup>1)</sup>.
- Ⓒ This surface belongs to customer's end system or panel where the power supply is mounted.

1) Note: 4 x Ø3.5 mounting holes; Ø5.5 max dimension of screw head. Recommended mounting torque for tightening: 4-8Kgf.cm.

Fig. 2 Installation of the Device

Fig. 3 Assembly Reference

- Any excessive twisting or bending may damage the device's PCB. Please handle the device with care.
- Please refer to Table 1 for the recommended Mating Connector, Terminal and AWG wire size.

Table 1	Power Supply Header	Mating Connector	Terminal	AWG
Input (TE)	1-1123724-3	1-1123722-5	1123721-1 or 1123721-2	18
Output (TE)	1-1123723-4	1-1123722-4		18

## 48V 200W 1 Phase / PJL-48V200WBAA

### Safety Instructions

- The device is not recommended to be placed on surface with low thermal conductivity, such as plastics, for example.
- For safety reason, please ensure the mounted device is kept at  $\geq 8\text{mm}$  safety distance for D1 from other components and equipment; and  $\geq 4\text{mm}$  distance for D2. Please insert an insulation sheet between the system and product, if the safety distance is  $< 8\text{mm}$  for D2 (Refer to Fig. 3)
- Installation of forced air, to ensure sufficient air flow, always maintain a distance and air flow direction as recommended in installation of forced air.
- Note that the device can become very hot depending on the ambient temperature and load of the power supply. Do not touch the device while it is in operation or immediately after power is turned OFF. Risk of burning!
- Do not touch the terminals while power is being supplied. Risk of electric shock.
- Prevent any foreign metal, particles or conductors from entering the device through the openings during installation. It may cause: Electric shock; Safety Hazard; Fire; Product failure
- Warning: The power supply must be mounted by metal screws onto a grounded metal surface. It is highly recommended that the Earth terminal on the connector be connected to the grounded metal surface.

### External Input Protection Device

The unit is protected at the L pin, with an internal fuse that cannot be replaced. The power supply has been tested and approved on 20A (UL) and 16A (IEC) branch circuits without additional protection device. An external protection device is only required if the supplying branch has an ampacity greater than above.

# PJL Open Frame Power Supply

## 48V 200W 1 Phase / PJL-48V200WBAA

### Functions

#### Start-up Time

The time required for the output voltage to reach 90% of its final steady state set value, after the input voltage is applied.

#### Rise Time

The time required for the output voltage to change from 10% to 90% of its final steady state set value.

#### Hold-up Time

Time between the collapse of the AC input voltage, and the output falling to 95% of its steady state set value.

#### ■ Graph illustrating the Start-up Time, Rise Time, and Hold-up Time

# PJL Open Frame Power Supply

## 48V 200W 1 Phase / PJL-48V200WBAA

### Inrush Current

Inrush current is the peak, instantaneous, input current measured and, occurs when the input voltage is first applied. For AC input voltages, the maximum peak value of inrush current will occur during the first half cycle of the applied AC voltage. This peak value decreases exponentially during subsequent cycles of AC voltage.

### Overload & Overcurrent Protections (Auto-Recovery)

The power supply's Overload (OLP) and Overcurrent (OCP) Protections will be activated when either output's current exceeds its specification as defined on Page 3 under "Protections". In such occurrence, the output voltage will start to droop and once the power supply has reached its maximum power limit, the protection is activated and the power supply will go into "Hiccup mode" (Auto-Recovery). The power supply will recover once the fault condition of the OLP and OCP is removed and  $I_o$  is back within the specifications.

It is not recommended to prolong the duration of  $I_o$  when it is less than OLP/OCP point, but greater than 100%, since such an overload condition may cause damage to the PSU.

### Short Circuit Protection (Auto-Recovery)

The power supply's output OLP/OCP function also provides protection against short circuits. When a short circuit is applied, the output current will operate in "Hiccup mode", as shown in the illustration in the OLP/OCP section on this page. The power supply will return to normal operation after the short circuit is removed.

### Dynamic Response

The power supply output voltage will remain within  $\pm 5\%$  of its steady state value, when subjected to a dynamic load from 0% to 100% of its rated current.

#### ■ 50% duty cycle / 5Hz to 1KHz

### Overvoltage Protection (Latch Mode)

The power supply's overvoltage protection circuit will be activated when its internal feedback circuit fails. The output voltage shall not exceed its specifications defined on Page 3 under "Protections". Power supply will latch off, and require removal/re-application of input AC voltage in order to restart.

#### The power supply should be latch

### Over Temperature Protection (Latch Mode)

As described in load de-rating section, the power supply also has Over Temperature Protection (OTP). In the event of a higher operating temperature at 100% load; or, when the operating temperature is beyond what is recommended in the de-rating graph, the OTP circuit will be activated. When activated, power supply will latch off, until the surrounding air temperature drops to its normal operating temperature or the load is reduced as recommended in the de-rating graph. Removal/re-application of input AC voltage will then be required in order to restart.

# PJL Open Frame Power Supply

## 48V 200W 1 Phase / PJL-48V200WBAA

### Others

#### Delta RoHS Compliant

#### Restriction of the usage of hazardous substances

The European directive 2011/65/EU limits the maximum impurity level of homogeneous materials such as lead, mercury, cadmium, chrome, polybrominated flame retardants PBB and PBDE for the use in electrical and electronic equipment. RoHS is the abbreviation for "Restriction of the use of certain hazardous substances in electrical and electronic equipment".

This product conforms to this standard

#### PFC – Norm EN 61000-3-2

#### Line Current Harmonic content

Typically, the input current waveform is not sinusoidal due to the periodical peak charging of the input capacitor. In industrial environment, complying with EN 61000-3-2 is only necessary under special conditions. Complying to this standard can have some technical drawbacks, such as lower efficiency as well as some commercial aspects such as higher purchasing costs. Frequently, the user does not profit from fulfilling this standard, therefore, it is important to know whether it is mandatory to meet this standard for a specific application.

### Attention

Delta provides all information in the datasheets on an "AS IS" basis and does not offer any kind of warranty through the information for using the product. In the event of any discrepancy between the information in the catalog and datasheets, the datasheets shall prevail (please refer to [www.DeltaPSU.com](http://www.DeltaPSU.com) for the latest datasheets information). Delta shall have no liability of indemnification for any claim or action arising from any error for the provided information in the datasheets. Customer shall take its responsibility for evaluation of using the product before placing an order with Delta.

Delta reserves the right to make changes to the information described in the datasheets without notice.
